New 1&2 Family Dwellings Permit Application Guide

Frequently Asked Questions:

Why Do I Need a Permit?

The permit and inspection process gives you, your neighbors, and the Village assurance that specific standards are met when expanding, altering, or repairing your property by complying with State and Local Code and Zoning Requirements. These standards are based on health, safety, and environmental considerations intended to protect the integrity of the building, the safety of its inhabitants, and the welfare of the public. Projects not completed according to code can affect aesthetics, values and quality of life in your neighborhood. Village building records are available from this department upon request. Prospective buyers can use these records to determine if permits were obtained and if compliance was achieved for specific projects.

When Do I Need a Building Permit?

A Building Permit is required prior to commencing constructing of a new house or duplex.

Who is Responsible for Obtaining a Permit?

The property owner is responsible for ensuring that a permit is obtained prior to work being started. Contractors may also apply and obtain permits on behalf of the property owner. Construction may not start prior to obtaining the Building Permit and posting the placard on site. Once a permit is obtained, the work must be started within six months or it will expire. If work is started within six months, the permit is valid for two years from the date of issuance.

Commencing work without a permit is subject to a late fee added to the normal permit fee. When unpermitted work is discovered, a Stop Work Order will be issued and a permit that accurately describes the work must be obtained before any work may resume.

How Do I Apply for a Building Permit?

Permits may be obtained from the Department of Neighborhood Services, Monday through Friday, 8 am – 5 pm. To ensure staff availability for permit issuance, please call in advance.

Prior to permit issuance, the applicant must submit 2 complete sets of plans and completed application forms. The following is a list of documents included in this packet designed to assist you in the plan submittal and permit application process:

- 1&2 Family Plan Submittal Checklist
- Village Building Permit Application
- Wisconsin Uniform Building Permit Application
- Certificate of Survey Information Sheet
- Sewer/Water Permit Application (Municipal Sewer)
- Permit to Install Access Driveway

- Fee Schedule

Miscellaneous Requirements

The Village of Hobart has requirements that each construction site be provided with restroom facilities and a dumpster/refuse container for proper storage/disposal of construction debris. Additionally the Village requires a Contractor Deposit of \$1,000 to cover potential damage costs to Village roads, ditches and other infrastructure.

How Much Does the Permit Cost?

The Permit Fee schedule is attached and may also be found on our Department Web site accessed at www.hobart-wi.org

Applicable Fees include:

- Finished Area Inspection Fee
- Unfinished Area Inspection Fee (unfinished basements, walk up attics, unfinished bonus rooms....)
- Garage Area Inspection Fee
- Park fee
- Administrative Fee
- State Seal Fee
- Erosion Control Fee
- Plan Review Fee
- Certificate of Survey
- Sewer Hook Up (Municipal Sewer only)
- Sewer & Water Lateral Inspection Fee (Municipal Only)
- Inside Plumbing Inspection Fee
- Well Operation Permit
- Contractor Deposit

This handout is intended to provide property owners/contractors with a simplified review of code provisions relating to the topic noted. This handout is not, however, actual code provisions. For a review of the regulations that would apply to your particular site, please refer to the Village of Hobart Zoning Ordinance.

I agree to comply with all applicable codes, statutes and ordinances and with the conditions of this permit; understand that the issuance of the permit creates no legal liability, express or implied, on the state or municipality; and certify that all the above information is accurate. If one acre or more of soil will be disturbed, I understand that this project is subject to ch. NR 151 regarding additional erosion control and stormwater management and the owner shall sign the statement on the back of the permit if not signing below. I expressly grant the building inspector, or the inspector's authorized agent, permission to enter the premises for which this permit is sought at all reasonable hours and for any proper purpose to inspect the work which is being done.

I vouch that I am or will be an owner-occupant of this dwelling for which I am applying for an erosion control or construction permit without a Dwelling Contractor Financial Responsibility Certification and have read the cautionary statement regarding contractor responsibility on the reverse side of the last ply.
